1 Namespace Index

1.1 Packages

Here are the packages with brief descriptions (if available):

[app](#) 1

2 File Index

2.1 File List

Here is a list of all files with brief descriptions:

[app.py](#) 2

3 Namespace Documentation

3.1 app Namespace Reference

Functions

- def [convert](#) ()

Variables

- [app](#) = Flask(__name__)
- [methods](#)
- [host](#)
- [port](#)

3.1.1 Function Documentation

3.1.1.1 `convert()`

```
def app.convert ( )
```

```
Convert xml data to dictionary format and then dump to YAML format  
:return:  
YAML message
```

3.1.2 Variable Documentation

3.1.2.1 `app`

```
app.app = Flask(__name__)
```

3.1.2.2 `host`

```
app.host
```

3.1.2.3 `methods`

```
app.methods
```

3.1.2.4 `port`

```
app.port
```

4 File Documentation

4.1 `app.py` File Reference
